### *Product Description*

The Nandi Bench is a taller, narrower version of the Nandi Day Bed. It can be placed in a variety of settings—at the entrance, the dining table, or even at the foot of a bed. Its gently curved ends are bent, heat free, by slotting a small piece of wood into the larger piece. This simple but special woodworking method saves material and limits the amount of waste generated during production. It also lends the bench a singular decorative look.

A three-seater, the Nandi Bench comes with a light, hand-tufted, organic cotton mattress, upholstered in Zanav textile.
